Profile

This Candidate recently has gotten off a contract is looking for a permanent opportunity. He is looking for an opportunity where he can go back to fully working with AWS and grow his cloud expertise.

In his last few projects, he has had a lot of focus on the infrastructure. He had to design, implement, maintain the infrastructure and services. He has provided installation and management of firewall/switches. In his most recent project, he was checking the pipelines to make sure everything is automated and if any cloud services are needed he made sure to make them available to the team, he made sure he is provisioning them, or is able to work with the team of developers to create a solution. He is available immediately.
