

Houston DevOps Architect and Engineer

Location: Texas, United States

Willing to relocate: Yes

Job Title: Houston DevOps Architect and Engineer

Position Type: Contract

Salary: 125 USD (Hourly)

Availability: 2 Weeks

Languages Spoken: English

Profile

This candidate began their career in IT as a System Administrator before transitioning to DevOps Engineer roles and most recently, DevOps Architect. In their current role, their primary purpose has been to build the CI/CD pipeline through Jenkins, automation with Chef, and the AWS architecture.

They also lead and mentor fellow team members in their projects while being an individual contributor. With their experience as both an Engineer and Architect, they are able to wear multiple hats in any projects they take on and will be a great asset to any DevOps team.
